### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

Re claims 2 and 6-9; see the Office Action mailed March 17, 2006.

Re claims 4, 5, and 16; the prior art of record, and in particular Ngo (US 7,006,313 B2), fails to teach or suggest an impedance-controlled write driver circuit comprising all of the limitations of the claims in combination and specifically including two differential pair circuits, each coupled between the two opposing terminals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ngo et al (US 6,879,455 B2) is the closest prior art of record and they teach a write driver circuit having a symmetrical pair of matched impedance control circuits, the write driver circuit containing multiple differential pair circuits.
